

## WATER METER PROJECT

The City of Paris will be conducting its Water Meter Replacement project during the months of August 2021 through December 2021. The scope of work for the project consists of the removal and replacement of residential and commercial water meters. In addition, a fixed base Advanced Metering Infrastructure (AMI) system will be installed through (4) gateway collectors around the City.

Perfection Group and NECO Water will be the City's contractors performing this work and all trucks and employees will be clearly identified with the appropriate logo. The changeout of each residential meter should take no more than 30 minutes and each commercial meter will be scheduled for changeout where applicable.
